\*) Total technical capacity is excluded from third-party access as of the day of enter of the exception granted to Gazelle pipeline into the force.

\*\*\*) In case that the UGS Háje is empty the technical capacity is decreased by 5 mcm/day.

\*\*\*\*) Technical capacity for third-party access is decreased by the technical entry capacity BP Brandov OPAL, which is excluded from the third-party access as of the day of enter of the exception granted to Gazelle pipeline into force.

\*\*\*\*\*) Higher technical capacity for the winter season, which is currently being increased on daily basis.

\*\*\*\*\*) In case that the UGS Háje is full the technical capacity is decreased by 5 mcm/day.

\*\*\*\*\*\*) From 1.1.2020 an increase of technical capacity is planned to level of technical capacity in GY 2020

+)) From 1.1.2021 an increase of technical capacity is planned to level 2 518,62 GWh/d
